

Bendtsen - electronic for Porosity Test | 170219

Compliant with standards

ISO 8791-1,ISO 8791-2,ISO 5636-3,SCAN P21,SCAN P84,DIN 53108,BS 4420

Description

Device for determining the roughness and permeability of paper or cardboard.

- Fully automated measuring cycle.
- Flow rate of 25 _ 5000 ml (other flow rates upon request).
- Up to 2 measuring heads: roughness top and air permeability.
- Test pressure selectable acc. to standard: 0.74 kPa, 1.47 kPa, 2.20 kPa.
- Stabilizing time selectable between 1 to 40 sec.
- Statistics with graphs, max, min, mean, standard deviation.

Characteristics

Electricity: 230 V / 50 Hz AC
Air: 600 kPa
